

TEACHING FOR MASTERY IN SECONDARY MATHEMATICS

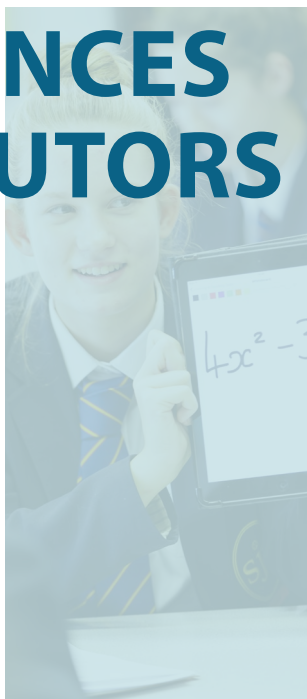

NCETM CONFERENCES FOR ITE TUTORS

Two national conferences are taking place to explore how mastery approaches are being developed in secondary school maths departments, and to share materials.

- Discuss teaching for mastery approaches now being developed at secondary level across England
- Hear from teachers involved in Maths Hubs mastery projects
- Consider ways to engage trainee teachers in these approaches
- Share practice and ideas
- Help shape future NCETM and Maths Hubs work

Initial teacher education is a critical stage in a teacher's development. In a spirit of collaboration, the NCETM is keen to strengthen relationships with the ITE community, for the benefit of trainee teachers and the students they will be teaching.
